

## Message to President Bush and U.S. Congress:

# We Need Pension Protection Now!

We, the undersigned Teamsters, family members, and retirees call on the U.S. Congress to pass—and President Bush to sign—Pension Protection Legislation in the First Session of the 109th Congress that will give multiemployer pension funds the economic relief they need to recover from the stock market losses of the past few years. This legislation is needed to protect the pension benefits of 10 million working Americans who participate in these plans.

Before tinkering with Social Security, Congress needs to fix our multiemployer pension plans.
